TOYOTA 86 / SUBARU BRZ 4 PISTON BRAKE UPGRADE

Harrop Engineering has developed a brake upgrade for the Toyota 86. The kit is a 4 piston front only.

Key Features:

- Increased braking performance
- Increased front brake diameter from 276mm to 345mm, greater leverage
- Increased brake disc thickness 24mm to 28mm
- 36 vane directional brake rotor
- 12 slots per face
- 4 piston alloy brake caliper, dust booted pistons
- Larger brake pad DB439
- Fitted with Ferodo DS2500 pads
- Firmer pedal feel under heavy braking
- Two piece design assemblies
- Light weight front aluminium disc adaptor to reduce disc run out and disc distortion
- Fits standard brake lines, braided line available
- 18" wheel required, won't fit factory 17" wheel
- All mounting hardware included
