

HARROP PERFORMANCE SYSTEMS

500Kw Package – HSV Gen-F GTS

Since 1955, Harrop has engineered and manufactured world-class performance products for a diverse range of applications. Whether it is, Original Equipment for Ford, Holden, Lotus or Category 1 Motorsport such as; F1, NASCAR & V8 Supercars or our proprietary aftermarket performance products.

Proudly designed and manufactured in Australia, Harrop now offers a range of packages engineered specifically to unleash the HSV Gen-F GTS. Impressive performance gains with driveline warranty can be achieved with the Harrop 500 package.

Package consists of:

- Harrop Cold-Air Intake
- Supercharger drive pulley
- 160 degree thermostat
- Harrop ECU Recalibration
- Driveline warranty*

**Results achieved with full exhaust system.*

Optional extras available include:

- Harrop Performance exhaust system & headers

Standard: 430Kw/740Nm

Harrop Enhanced: 500Kw/900Nm

Power and Torque figures are measured from our Dynapack Hub Dyne and calculated as flywheel using 98RON fuel. Individual results will vary.

Price from \$4,430inc
